

want classroom recycling bins
for your school?

St. Louis City Recycles is proud to announce our
“**City Schools Recycling Outreach Program!**”
Public or private schools located in St. Louis City
are eligible to receive up to 30 **FREE** classroom
recycling bins:

www.STLCityRecycles.com

How It Works

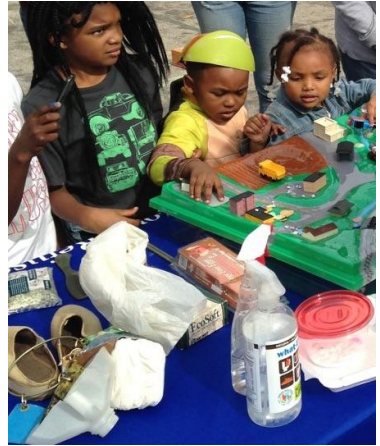

1. Commit to being the recycling leader for your school!
2. We'll help you and your principal devise a recycling collection plan for your school.
3. Schedule a recycling presentation for your classroom.
4. Receive recycling bins, rollcarts and pledge tree materials in your teacher toolkit.
5. Start recycling and track your progress!

- We have up to 30 classroom bins for your school.
- Each bin will have a poster to hang near it of what does and does not go in the recycling bin.
- Your school will also receive two rollcarts to ease recycling collection.

Classroom Presentations

Pre-K— 2nd Grade: Our puppet show, “Dori, Recycling and the Wicked Waste Bin” teaches young kids the importance of recycling through a fun play.

3rd Grade— High School

The Enviroscape model is a hands on demonstration of how litter and waste affect our environment, streams and groundwater. We also discuss the entire life cycle of a product and how recycling reduces harmful waste.

High School:

“Eek! It leaks!” is a fun activity where students are given plastic strips and tape and challenged to make a plastic bag that

doesn't leak. The bag is akin to a landfill liner and shows that despite our best efforts, the liner will eventually leak. Thus we need to reduce waste by reducing, reusing and recycling.

Toolkit Details

You'll receive a toolkit with materials for a school-wide recycling pledge tree and a weight tracking chart. Students and staff will sign a leaf as a pledge to recycle. The whole tree will be on display in the school as a visual

reminder to students, parents and staff of their commitment to recycling! Your students can record the weight of the recycling your school collects and using those numbers, we can give you personalized facts for how much your class is helping the environment!
