

Want to learn more? Join us for a FREE Teacher Professional Development Workshop

Get started in building your knowledge and understanding of stormwater issues in our area at an upcoming teacher workshop. Workshops are designed to help facilitate teachers' desire to learn more about stormwater management and water quality while discovering new ways to bring this topic back to their classroom.

During the workshop we will:

- **Discuss issues** related to stormwater management and water quality such as non-point vs point source pollution, pollution impact, and best management practices for our community.
- Review **curriculum ideas** that tie to state standards while still providing meaningful, engaging, and **hands-on learning opportunities** you can do with your students!
- Train **YOU** on how to use the popular EnviroScape® watershed model; models are available for loan FREE from the MSD Clean Water Education program. Work with staff to learn how to present and use this model in your classroom.

Upcoming Workshop Opportunities:

Saturday, March 2nd, 2019

8:30 am to 2:00 pm
Commerce Bank Center for Science Education
4651 Shaw Blvd., St. Louis, MO 63110
Lunch and snacks provided

Saturday, September 28th, 2019

8:30 am to 2:00 pm
Commerce Bank Center for Science Education
4651 Shaw Blvd., St. Louis, MO 63110
