### Keep Electronic Devices Out of the Landfill

Take advantage of both Spring and Fall Electronics Recycling events. STL City Recycles is partnering with Midwest Recycling Center (MRC) to host two electronic recycling events.

The Fall 2024 event will be October 19th. Look for more details regarding the Spring 2025 recycling event. Follow us on social media @stlcityrecycles to stay updated.

### Recycle Coach Now Available For City And County Residents

Recycle Coach helps residents better understand what they can recycle in their Blue Bins. Try the amazing image search by taking a photo of any object to see where it can be donated or recycled! The app also has fun quizzes and allows you to get notifications about Refuse schedule changes or upcoming events, like electronics recycling collections.

### Invite STL City Recycles to your Community Meeting or Event

Each year, Recycling Specialists present at dozens of neighborhood meetings across the city to help people learn to recycle responsibly!

Community events give the recycling team the opportunity to share recycling info and goodies in a fun and engaging way.

Consider inviting the STL City Recycles team to your next city meeting or event. [STLCityRecycles.com/invite-us](https://STLCityRecycles.com/invite-us)

### Partnering with St. Louis Public Libraries

Thanks to the St. Louis Public Libraries, STL City Recycles info is now available in all of the city library branches. Having information at SLPL allows us to reach more residents each day. Thank you for being excellent partners, St. Louis Public Libraries!

### Stick with the 6 to Recycle Responsibly!

Plastic bags and food waste do NOT go in your Blue Bin! Always keep your recyclables loose, clean and dry!

### Water in a Can?

Yep, St. Louis' great tasting water is now available in an infinitely recyclable aluminum can!

Aluminum cans are recycled at higher rates than any other beverage container - and at more than twice the rate of plastic bottles!

Let's show St. Louis that recycling works! Be sure to pick up a can of cold refreshing ONESTL water the next time you visit the St. Louis Art Museum or Missouri History Museum. Hopefully there will be many more locations soon!

Of course, bringing your own refillable water bottle is still the best way to help protect the environment and enjoy St. Louis' great tasting water!

Have you seen our billboards around the city? Plastic bags and film do not go in your Blue Bin! Remember to recycle them at the grocery store.

Funding for this project provided by St. Louis-Jefferson Solid Waste Management District and the MO Department of Natural Resources.
